FILTERCLEAN

Filter & Oil Cooler Cleaning Compound Specially Formulated Cleaner for Removal of Partially Carbonised Oil, Sludge and Coke-Like Deposits from Filters and Oil Coolers

DESCRIPTION & APPLICATIONS:

FILTERCLEAN is a specially formulated liquid cleaning compound designed for the removal of partially carbonised oils, sludge, varnish and coke-like deposits from oil filters, oil coolers and associated equipment. The product penetrates and loosens accumulated deposits that can restrict flow, reduce cooling efficiency and impair equipment performance during operation. It is suitable for cleaning both metal and ceramic filter elements and can be applied via soaking or recirculation. Regular maintenance cleaning with FILTERCLEAN helps prevent the build-up of carbonized residues and coke-like deposits, extending equipment service life and supporting efficient system operation.

The product is non-corrosive, easy to use, and provides a cost-effective solution for routine maintenance cleaning programs. Suitable for cleaning metal oil filters, ceramic oil filters, oil coolers, oil heaters, and lubrication system components contaminated with carbonized oil deposits.

FEATURES & BENEFITS:

- Removes partially carbonised oil deposits.
- Suitable for metal and ceramic filters.
- Effective for cleaning oil coolers and oil heaters.
- Helps prevent formation of coke-like deposits.
- Non-corrosive formulation.
- Suitable for soaking and recirculation cleaning methods.
- Easy to use and economical in operation.

DIRECTIONS FOR USE:

Use FILTERCLEAN undiluted. Components may be cleaned by immersion in a cleaning bath or by recirculating the product through the equipment using a suitable pump and tank arrangement. Cleaning time typically ranges from 6 to 24 hours depending on the degree of contamination. The cleaning solution temperature should not exceed 60°C.

SHIPSERV TN-315946

ISO 9001:2015 CERTIFIED COMPANY

TYPICAL PROPERTIES:

Property	Typical Value
Appearance	Clear Liquid
Application Method	Soaking / Recirculation
Operating Temperature	Up to 60°C
Corrosivity	Non-Corrosive
Suitable Surfaces	Metal & Ceramic Filters

STORAGE AND HANDLING:

- Store in original tightly closed containers.
- Protect from excessive heat and direct sunlight.
- Keep container sealed when not in use.
- Follow standard industrial chemical handling procedures.

SHELF LIFE:

24 Months from date of manufacture when stored under recommended conditions.

STANDARD PACKING:

- 25 L Plastic Cans.
