OILBREAK ECO

High-Performance Oil Spill Dispersant for Rapid Hydrocarbon Dispersion & Environmental Protection

DESCRIPTION & APPLICATIONS:

A high-performance water-based oil spill dispersant developed for the rapid treatment of marine and coastal oil pollution incidents. The advanced formulation quickly disperses hydrocarbon slicks into fine droplets, enhancing natural biodegradation and reducing the environmental impact of oil contamination.
Effective on crude oil, diesel, fuel oils, lubricants, and other petroleum hydrocarbons, OILBREAK ECO provides a fast and environmentally responsible response solution for ports, harbors, tanker terminals, offshore facilities, and shoreline cleanup operations. The ready-to-use formulation allows rapid deployment with conventional spraying equipment during emergency spill responses.

FEATURES & BENEFITS:

- Rapidly disperses oil spills and promotes natural biodegradation.
- Effective on crude oil, diesel, fuel oils, lubricants and petroleum residues.
- Helps reduce environmental impact and hydrocarbon contamination.
- Water-based, low-toxicity and non-flammable formulation.
- Suitable for marine, offshore, harbor and shoreline applications.
- Ready-to-use product requiring no dilution.
- Easy application using conventional spraying equipment.
- Cost-effective solution for emergency spill response operations.

DIRECTIONS FOR USE:

Apply OILBREAK ECO directly onto the oil-contaminated area using suitable spraying equipment. Ensure uniform coverage of the oil slick and provide adequate agitation through wave action, propeller wash, water jets or mechanical means to promote effective dispersion. For large-scale incidents, vessel-mounted or boom-mounted spray systems may be used as part of an organized spill response programme.
