SHERAN CHEMICALS

Cargo Hold Cleaning.

SHERCLEAN CEMENT REMOVER

Heavy-Duty Cement, Concrete & Mineral Deposit Removal Compound

PRODUCT DESCRIPTION:

SHERCLEAN CEMENT REMOVER is a powerful acid-based cleaning compound specifically developed for the removal of cement residues, concrete splatter, lime scale, rust stains, and mineral deposits from marine and industrial equipment. The fast-acting formulation rapidly dissolves hardened cementitious deposits and inorganic contamination, restoring surfaces to a clean and serviceable condition.The product is particularly effective for cargo holds, tanks, heat exchangers, cooling systems, pipelines, deck surfaces, machinery components, and other equipment affected by cement, concrete, scale, and rust contamination. Its powerful cleaning action helps reduce manual cleaning effort while improving maintenance efficiency and equipment readiness.Suitable for marine, offshore, industrial, and maintenance applications, SHERCLEAN CEMENT REMOVER provides an economical and reliable solution for cement removal, descaling, and surface restoration operations.

FEATURES & BENEFITS:

- Rapidly dissolves cement residues, concrete splatter, lime scale, rust stains, and mineral deposits.
- Effective on cargo holds, tanks, pipelines, heat exchangers, cooling systems, and machinery components.
- Restores contaminated surfaces and improves equipment cleanliness.
- Reduces cleaning time, labour requirements, and maintenance downtime.
- Suitable for descaling, maintenance cleaning, and surface preparation applications.
- Fast-acting and economical formulation for marine and industrial cleaning programs.

RECOMMENDED DOSAGE:

- **General Cement Removal**

Degree of Contamination	Dosage
Light Contamination	5%
Moderate Contamination	10%
Heavy Contamination	15%

- **Descaling Applications**

Application	Dosage
Heat Exchangers & Cooling Systems	5 - 10%
Heavy Scale Removal	10 - 15%

OPERATING CONDITIONS:

Parameter	Recommendation
Cleaning Time	30 Minutes - 8 Hours
Maximum Efficiency Temperature	60°C
Water Type	Fresh Water Preferred

CLEANING PROCEDURE:

Cargo Hold & Surface Cleaning

- Remove loose debris and contamination.
- Apply a 5 - 15% solution depending on contamination levels.
- Allow sufficient contact time for deposits to dissolve.
- Rinse thoroughly with fresh water.

Heat Exchanger & System Descaling

- Prepare a 5 - 10% cleaning solution.
- Circulate through affected equipment until deposits are removed.
- Drain and flush thoroughly with clean water.

Spot Cleaning

- Apply diluted solution directly onto contaminated areas.
- Allow 10 - 30 minutes contact time.
- Agitate if required and rinse thoroughly.

STORAGE AND HANDLING:

Store in tightly closed containers in a cool, dry, ventilated place. See the latest SDS for safety details.

STANDARD PACKING

25 L HDPE Cans & 200 L HDPE Drums.

TYPICAL PROPERTIES:

Property	Typical Value
Appearance	Clear Liquid
Colour	Clear to Light Yellow
Odour	Characteristic
Density @ 25°C	1.05 - 1.15 g/cm³
pH (Concentrate)	<2.0
Water Solubility	Completely Soluble
Flash Point	Non-Flammable

Typical values should not be considered product specifications.

COMPATIBILITY

Suitable for stainless steel, ceramic surfaces, porcelain, concrete equipment, cargo holds, cooling systems, and other acid-resistant surfaces. Carbon steel equipment may be cleaned under controlled descaling conditions following recommended operating procedures.

Not Recommended For

- Aluminum.Zinc.Galvanized Surfaces.Acid-Sensative Coatings.

SHELF LIFE

24 Months from date of manufacture when stored under recommended storage conditions.
